Internet Remote Access through the LAN

The LAN network is the most economical way to connect your remote site or device to the Internet. Thanks to our cloud-based remote connectivity solution Talk2M, OEMs and system integrators can set up a secure remote access without any change to the factory network settings.

Technical characteristics:

| | | |
|-----------------------|------------------------|---------------------------------------------------------------------------------------------------------------------|
| Ethernet Port | 10/100Mbps, Auto sense | |
| Operating temperature | -25 to +70°C | |
| Certifications | | |
| CE | Compliant with | EMC directive 2004/108/EC RoHS directive 2011/65/EU REACH |
| | According to standards | EMC emission Class A EN55022; EN55024 Safety: EN60950 |
| FCC | Compliant with | CFR 47, part 15B |

FLX3101

About Flexy:

The eWON Flexy is the first industrial modular M2M router and data gateway designed for OEMs and system integrators. Its flexibility allows remote devices to be linked in an environment where communication technologies are constantly changing, and lets you communicate universally with the most varied field equipment, regardless of the protocol used.
