

IIoT Gateway with VPN Connectivity

The Ewon Flexy is a multipurpose internet data gateway that allows Machine Builders to monitor and collect vital KPIs for analysis and predictive maintenance. The Talk2M VPN service is included for PLC remote troubleshooting.

Ewon Flexy

IIoT Gateway with VPN Connectivity

Remote connectivity

- VPN Remote Access for PLC troubleshooting
- Security-certified Talk2M global cloud infrastructure included
- Easy setup in minutes for unrivalled connectivity success

On-premise Data Monitoring

- All major PLC protocols for data logging and alarm notification
- Local web-dashboard for easy monitoring of KPIs through Talk2M's M2Web service
- OPC UA server to share data with Enterprise Systems

Data Collection for IoT Applications

- Full flexibility to send data to any server (local or cloud)
- End-to-end solution with HMS Solution Partners' software (out of the box)
- Multiple IoT connectors, and MQTT/HTTPS through embedded BASIC or JAVA scripting engine
- Talk2M Data Services with APIs for 3rd party software integration

Proven with:

... and many more

Layered security approach

Talk2M ensures high security using a layered security approach called "Defense in Depth". This approach safeguards the integrity and confidentiality of data, along with availability and resilience of the information system.

The security of Ewon's solution is regularly audited by independent organizations and has obtained the ISECOM STAR and ISO 27001 certifications.

- Policy compliance
- Network infrastructure
- User and access management
- Traffic encryption
- Firewall
- Ewon device
